About me

I'm a Mathematician by training, working since 2019 in both fundamental and applied aspects of Quantum Theory, from effects of vector potential and gauge theories in physics, to machine learning algorithms applied to molecular systems.

Since 2016, I'm involved in sci-comm projects, i.e., when I started sharing my interests in pop science books through series of articles on *Mathone.it* and on the platform *Quora*. More recently, I joined the PhD Students Association LuxDoc, where I had the opportunity of co-organize several outreaching activities.

Interests

In my free time I like reading popular science and philosophy/history books, I'm a great Formula1 and MotoGP fan and I cultivate my passion numismatic. I'm a former cyclist and cycling coach, but now I simply enjoy discovering Luxembourgish landscapes with my bike. I often play board games and I'm a chess amateur.

Languages

- Italian (Mothertongue) ●●●●●●●●
- English (Proficient) ●●●●●●●●
- French (Fluent) ●●●●●●●●
- German (A2.2 level) ●●●●●●●●

Education

- Jan.2019 PhD Candidate University of Luxembourg Luxembourg
Modeling the Aharonov-Bohm effect through Path-Integrals
- 2018-2018 Thesist Institut Néel Grenoble
Long range interactions in frustrated electronic systems.
- 2017-2018 Erasmus+ Mobility Period Grenoble
Nuclear Engineering and Nano Science Program
- 2016-2018 M.Sc. Mathematics Verona
Majoring in Applied Mathematics: *physics curriculum*
- 2013-2016 B.Sc. Applied Mathematics Verona
Majoring in Applied Mathematics: *modelistic curriculum*

Teaching Assistant

- 2021 Tutor of Mechanics, *B.Sc. Engineering, Uni. Luxembourg*
- 2019 Introduction to Linux, , *B.Sc. Physics, Uni. Luxembourg*
- 2016 T.A. of Real Analysis, *B.Sc. Mathematics, Uni. Verona*
- 2016 T.A. of Time Series Analysis, *B.Sc. Mathematics, Uni. Verona*

Foreign Experiences

- 2017 Summer School in Theoretical Physics Utrecht (Netherlands)
Thermal and statistical physics, electrodynamics and cosmology.
- 2017 ECMI Modeling Week Lappeenranta (Finland)
Summer School in Applied Mathematics

Science Communication Projects

- As President of LuxDoc asbl, I had the opportunity of (co-)organize and coordinate several outreaching projects, among which
- Oct. 2021 Luxembourg ScienceSlam 2021 Luxembourg
Science Communication contest (5k€ raised from FNR)
 - June 2021 3MT - 3 minutes thesis Luxembourg
"Explain your research in 3 minutes." (3k€ raised in sponsorships)
 - Feb. 2021 WOGIS - Women and Girls in Science Luxembourg
Series of online meetings celebrating women in STEM disciplines
- Since 2017, I'm active on several social platforms sharing pop science contents:

Followers			Role
Mathone	Instagram: 12.5k	Facebook: 4k	Co-editor
La Gaia Scienza	Facebook 4k		Admin
Phi6 Passion	Instagram: 150	Facebook: 4k	Founder and Admin

Short Bio

I see in science communication not only a funny and enjoyable moment where I can share and discuss the topics that I like the most, but also a powerful and effective way for communicating state of art results current research topics to layman people. Making people aware of the dynamics and the results of the scientific world can, from one side, recover the central role of science in modern society, while, from the other side, close the gap between the academic ivory tower and the average person scared by tedious and abstract concepts.

A.S.B.L. Organizations

- 2020-2022 President of LuxDoc asbl Luxembourg
President (previously Vice-President) of the biggest Luxembourgish PhD Students Association.
- since 2020 Vice-President Mathematics Alumni Association Verona
After my experience as Representative Student, I helped cofounding the Mathematics Alumni Association as Vice-President.
- 2016-2017 President of "Open Your Mind" Association Verona
Student Association
